Review Criteria

Deliverables Match Milestone Description
✔ Passed

Quality and Completeness of Milestone
✔ Passed

Accessibility of Supporting Evidence
✔ Passed

Budget Alignment (Value for Money)
✔ Passed

Justifications

- 1 The team delivered what this milestone asked for. The service is live on the Marketplace, the GitHub repo runs fine, and the on-chain transaction links back it up. The video demos and working test calls confirm everything matches the milestone description.
- 2 The work delivered is solid and complete. The service now runs on the SNET Marketplace, the repo is clean, the demos back everything up, and all required proofs were included. Nothing major missing or out of place.
- 3 All supporting evidence was easy to access. The repo, transaction links, demos, and marketplace service were all open and viewable without issues. Nothing was hidden or hard to verify.
- 4 This was a 20k milestone, and the team delivered a fully working service now live on the Marketplace, with demos and proofs to back it up. The value matches the cost.

Did the team provide a demo, prototype, repository test run, or marketplace onboarding trial?

Yes

Describe (deliverable link):

<https://docs.google.com/document/d/1V9ROx21HqtqqUEhofAyqc59UxrECT7kEZRe7dBOkQ6s/edit?tab=t.0>

Verification Confirmation

Demo, prototype, repository test run, and marketplace onboarding trial were all verified successfully. The reviewer was able to verify functionality through code, live demo, sandbox, and screenshots.

Final Recommendation

Approved

It meets the success criteria because the service is deployed, working as expected, and backed with clear evidence - repo, demos, and on-chain links. Everything required by the milestone was delivered and verified.
